

Changing the Sierra IP Address for Envisionware PC Reservation

1. Log into you Envisionware Server.
2. The PC Reservation Management Console should be running.

3. From the Management Console, click Preferences
4. Click the Validating Authority tab.
5. Once this comes up, make sure the existing Validating Authority is highlighted, then click edit.

6. Change the Server Address to **216.17.115.215**.
7. The port (4500) remains the same.

8. If desired, you may update the description to reflect the change in IP Address.
9. Click OK.
10. Now on the PC Reservation Management Console window, click Apply and OK.
11. Leave the PC Reservation Management Console open. This must be running for Envisionware to work.
